MEDai Launches Latest Version of Regulatory Reporting and Outcomes Analysis Applications at HIMSS 2004

February 12, 2004 – (Orlando, FL) MEDai, Inc., headquartered in Orlando, FL, a provider of innovative solutions that empower decision-makers to improve the delivery of healthcare announced this week they will launch the latest versions of their regulatory reporting and outcomes analysis application at the upcoming HIMSS 2004 show in Orlando. MEDai provides solutions to decision makers in the provider markets through their Pinpoint *Quality*[™] (*PPQ*) and Pinpoint *Compliance*[™] (*PPC*) applications.

Pinpoint *Quality* systematically collects data to measure performance and identify best clinical practices. Organizations can then use that information to improve quality of care and patient safety. They can also use it for peer review, regulatory reporting and on-going clinical process management. The integrated financial measures allow healthcare providers to realize cost savings and a return on their investment. The new enhanced version of PPQ provides quick and easy analysis of opportunities for cost savings, immediate access to executive-level reporting on facility-specific priority diseases, key indicators, and areas for savings, enhanced trend analysis, and alerts for hospital administrators to unexpected disease problems.

MEDai's JCAHO reporting application, Pinpoint *Compliance*[™], is a web-based application that loads data electronically and automatically from all of the places information resides—administrative, registry and clinical databases. After the data is run through MEDai's validation engine and issues are identified the client can readily enter updates. An easy-to-use data entry form highlights the required information simplifying the process for nurses. Pinpoint *Compliance* generates quarterly reports necessary to meet JCAHO requirements. In addition, the same data can be submitted to CMS, AHA, your local professional review organization, or other quality initiatives such as the National Quality Forum. As you implement continuous quality improvement programs, Pinpoint *Compliance* helps monitor and track results.

About MEDai

MEDai, Inc. is a leading health information company offering award-winning solutions for the improvement of healthcare delivery. Utilizing cutting-edge technology, payors and care management organizations are able to predict patients at risk, identify cost drivers for their high-risk population, forecast future health plan costs, evaluate patient patterns over time, and improve outcomes.
