## **MEDai and Shared Health Partner to Improve Clinical Xchange™ Platform**

**Orlando, Florida – (September 9, 2008)** MEDai, Inc., headquartered in Orlando, FL, a leading provider of advanced solutions for healthcare that utilize award-winning predictive analytics, announced earlier this week that it partnered with Shared Health®, Inc., Tennessee’s largest public/private health information exchange (HIE), to introduce a major system upgrade, the Shared Health® Clinical Xchange™ platform, at the beginning of this month.

Shared Health’s Clinical Xchange improves the types of clinical information available to providers, helping physician practices operate more efficiently and deliver better overall patient care by merging key clinical data with administrative data to take practices “out of the silo.” For payors and employers, Clinical Xchange supports proactive and preventive health initiatives – such as care management, wellness and early intervention strategies where authorized and appropriate. “The new Clinical Xchange platform is part of our commitment to continually deliver market-leading, problem-solving solutions that reduce inefficiencies and fragmentation in clinical information exchange,” said Jana Skewes, president and chief executive officer.

“MEDai is pleased to be a part of Shared Health’s Clinical Xchange platform,” said Swati Abbott, president of MEDai. “Both organizations are dedicated to maximizing the benefits of predictive analytics by developing solutions that promote data sharing and improve quality in the healthcare delivery system,” she added.

### **About Shared Health**

Shared Health is transforming health care by offering innovative health information technology solutions that improve quality and lower costs. Shared Health’s web-based applications securely share and connect medical information across a patient’s network of clinicians. It continually strives to be the clinician’s trusted partner for sharing relevant patient information at the point of care, enabling both health care professionals and consumers to improve outcomes. For more information on Shared Health, visit the company’s web site at [www.sharedhealth.com](http://www.sharedhealth.com).

### **About MEDai**

MEDai, Inc. is a leading health information company offering award-winning solutions for improvement of healthcare delivery. Utilizing cutting-edge technology, payors and care management organizations are able to predict patients at risk, identify cost drivers for their high-

risk population, forecast future health plan costs, evaluate patient patterns over time, and improve outcomes. For more information on MEDai, visit [www.medai.com](http://www.medai.com). Its parent company, Elsevier ([www.elsevier.com](http://www.elsevier.com)), is a world-leading publisher of scientific, technical and medical information products and services with more than 7,000 employees in over 70 offices across 24 countries.
