HealthSTAT, Inc. Selects MEDai's Predictive Modeling Solutions to Enhance Health Risk Management Offerings

Orlando, Florida – (July 10, 2007) MEDai, Inc., headquartered in Orlando, FL, a leading provider of advanced solutions for healthcare that utilize award-winning predictive modeling technology, announced last week that HealthSTAT, Inc., headquartered in Charlotte, North Carolina has signed a multi-year agreement to utilize its' Risk Navigator *Clinical*[™], Risk Navigator *Financial*[™] and Risk Navigator *Reporter*[™] predictive modeling solutions.

HealthSTAT's goals include reversing the trend in healthcare costs by identifying and managing risk and improving the health of the client's employee workforce. "At HealthSTAT we understand the importance of having a precise and proven process of identifying individuals with high health risks, as this has been a pivotal component of our on-site health risk and medical management program for many years" said Crockett Dale, HealthSTAT's President and CEO. "Our services give employers greater control over the rising cost of healthcare and provide employees with a personal resource to improve their health while assisting them in navigating the increasingly complex healthcare delivery system," he added. "MEDai's solutions offer the superior predictive accuracy necessary to accomplish our goals along with critical information related to gaps in care. Risk Navigator *Clinical* and Risk Navigator *Financial* together will enhance our overall health risk management offerings by addressing high-risk member identification, medical guideline gaps information, actuarial and underwriting reporting, cost predictions, and modeling flexibility. These tools will catapult HealthSTAT, our Clinic Providers, Clients, and Clinic Participants forward in the high risk, disease management and chronic condition arena."

For more than a decade MEDai has provided predictive modeling solutions to the healthcare industry. MEDai's award-winning technology has repeatedly established itself as the most accurate solution commercially available. The most recent evidence of this is MEDai's outstanding performance in the Society of Actuaries' study as well as its previous wins in the internationally prestigious KDD and GFKL competitions.

"MEDai has taken predictive modeling one step further by offering solutions that not only focus on member/employee centric issues but also employer issues," said Swati Abbott, President of MEDai. "Our clients benefit from our ability to utilize our award-winning technology to address an array of business concerns from the standpoint of various healthcare constituents," she added. "We are delighted that HealthSTAT has selected our solutions to help improve their overall business model."
